# 1 About

Notes on processing and analysis of CTD-chipod data collected during FLEAT cruise..

## 2 Data and Processing

Data paths are set w/ :

- `erb+Loadchipod_pathsFLEAT.m+`  
Chipod deployment info is given in
- `erb+ChipodDeploymentFLEAT+`

### 2.1 CTD

Raw (hex) CTD data are processed with:

- `erb+ProcessCTD_hexFLEAT.m+`

### 2.2 Chipod

Table 1: Summary of Chipod deployment .

Raw chipod files are plotted with

- `erb+PlotChipodDataRawFLEAT.m+` to check for obvious issues/malfunctions with any of the instruments; these plots are saved in `erb+/Figures/chipodraw/`. Based on a quick look at these:

- 

Files with obviously bad or missing data (based on above raw plots) are noted in `erb+badfilelistXXXX.m+` and, which will prevent them from being loaded in the processing.

Processing scripts are:

- `erb+MakeCastsCTDchipodFLEAT.m + erb + DoChiCalcFLEAT.m+`

### 2.3 Further processing and analysis

- Data from all casts are combined into a single structure w/ `erb+MakeCombinedStructFLEAT.m+`

Figure 1: Map of CTD cast locations during cruise FLEAT.

### 3 Processing Notes

- Table efchidepinfo gives the info for *Tableefprocsum* gives a summary of the processing from *MakeCasts*.

#### 3.0.1 Time Offsets

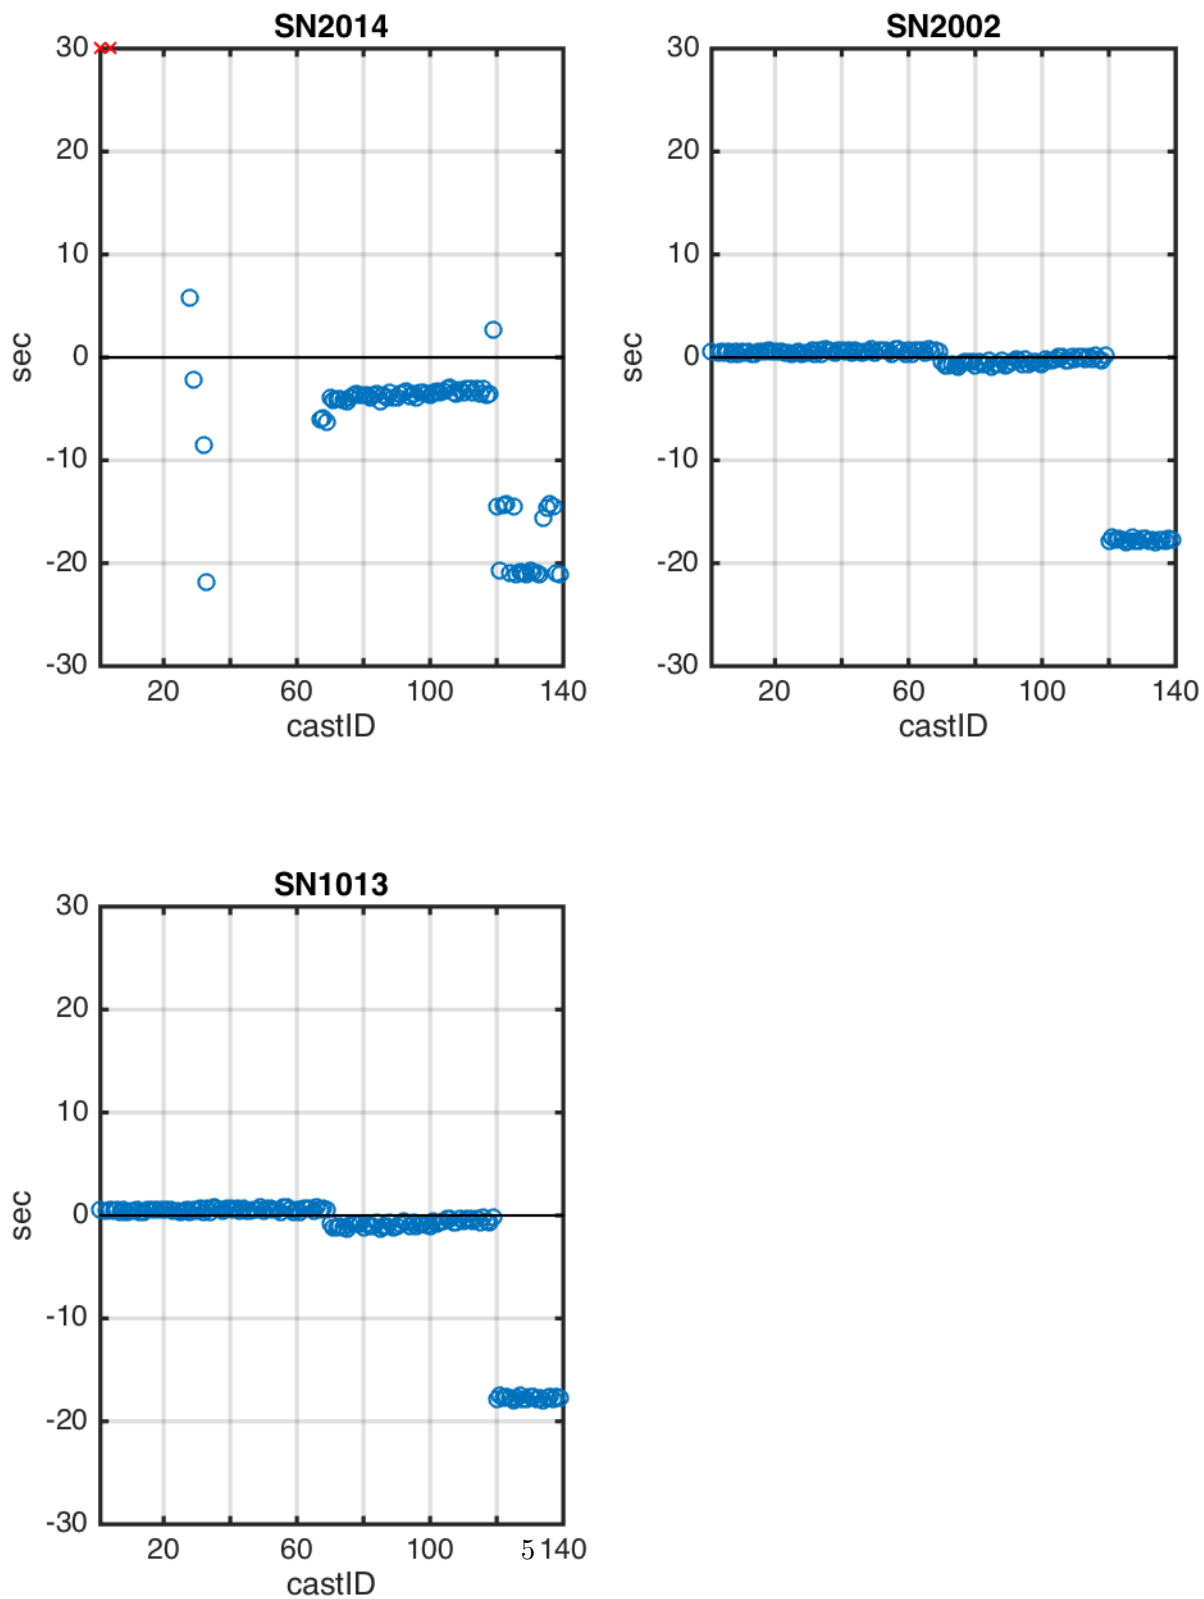

Figure 2: Time-offsets for all  $\chi$ pods, found by aligning with CTD data.

## 4 Example Raw Chipod Data for 1 cast

Figure 3: Raw chipod data from SNSN2014 for a CTD cast.

Figure 4: Raw chipod data from SNSN2002 for a CTD cast.

Figure 5: Raw chipod data from SNSN1013 for a CTD cast.

## 5 Results

### 5.0.2 CTD Data

Figure 6: Plot of temperature and salinity from CTD downcasts on all casts.

### 5.0.3 Data from each individual Chipod

Figure 7: All chipod profiles from sensor SNSN2014. Variables are: N2, dTdz, chi, eps, and KT.

Figure 8: All chipod profiles from sensor SNSN2002. Variables are: N2, dTdz, chi, eps, and KT.

Figure 9: All chipod profiles from sensor SNSN1013. Variables are: N2, dTdz, chi, eps, and KT.

#### 5.0.4 One variable from all Chipods

Figure 10: Plot of one variable from all chipods.

Figure 11: Plot of one variable from all chipods.
